Mr.
A letter please

April 11, 1989

The Council for Tobacco Research, USA, Inc.
900 3rd Avenue
New York, NY 10022

Gentlemen:

Would you be kind enough to send me information regarding research grants? I am interested in applying for research support to study the mechanism of global regulation of *Bordetella pertussis* virulence factors and outer membrane proteins by pyridines, especially nicotinic acid and nicotinamide. I enclose two reprints which indicate some of the observable changes in the cell surface proteins.

Thank you for your assistance.

Sincerely yours,

Charlotte Parker
